

Healthcare AI QA Engineering Platform

Step 1.2 - Business Requirements Document

BRD Overview

- Document: CFH-BRD-001
- Product: CareFlow Health
- Version: 1.0
- Status: BASELINE / APPROVED FOR PROJECT DEVELOPMENT

Product Vision and Business Problem

- Frontend-only healthcare workflow simulation for QA/AI engineering demonstration.
- Business problems, objectives, and stakeholder model documented.

Business Processes and Requirements

- 15 business processes (BP-001 .. BP-015)
- 24 business requirements (BR-001 .. BR-024)
- 22 business rules (BRULE-001 .. BRULE-022)
- 12 non-functional requirements (NFR-001 .. NFR-012)

Security and Privacy

- Synthetic data only, no PHI, no secrets, no compliance-certification claims.

Risks, Assumptions, Constraints

- 15 risks with mitigation and ownership
- 15 assumptions and explicit architecture constraints

RAG and AI Relevance

- BRD structured for future ingestion, retrieval, and agent reasoning workflows.

Traceability

- Updated requirements traceability template with BRD source-layer IDs and downstream TBD mapping.

Interview Talking Points

- Why BRD-first before PRD
- Why stable IDs for QA and AI traceability
- Why frontend-only and synthetic healthcare data

Next Step

- Step 1.3 PRD (planned, not executed in this step)
