

Healthcare AI QA Engineering Platform

Step 1.3 - Product Requirements Document

PRD Overview

- Document: CFH-PRD-001
- Product: CareFlow Health
- Version: 1.0
- Status: BASELINE / APPROVED FOR UI DESIGN AND IMPLEMENTATION

Product Architecture and Personas

- Role personas defined: Patient, Doctor, Nurse, Receptionist, Admin
- Role capability matrix and information architecture defined

Functional and Non-Functional Requirements

- Functional requirements: FR-001 .. FR-030
- Non-functional requirements: NFR-001 .. NFR-014
- BRD references, validation, error behavior, and testability captured

UI and Validation Requirements

- Validation, state handling, dialogs, notifications, accessibility, responsiveness defined

Traceability

- BRD-to-PRD mapping added with stable identifiers
- Downstream artifacts remain TBD per step constraints

RAG/MCP/Agent Relevance (Planned)

- PRD structured for future ingestion/retrieval and requirement reasoning

Interview Talking Points

- BRD vs PRD decomposition value
- Why stable IDs and testability-first requirement design

Next Step

- Step 1.4 (planned, not executed in this step)
