

Step 1.9 Implementation Report

Healthcare AI QA Engineering - CareFlow Health

Status: PASS

Objective: Define synthetic test-data and test-management strategy.

Implemented:

- Test data strategy and catalog
- Test management strategy
- Jira/Confluence/Jenkins strategy contracts
- Test data lifecycle and traceability docs
- Test Case -> Test Data mapping in requirements traceability

Coverage:

- Test cases mapped to datasets: 96
- Unique datasets referenced: 29
- Orphan dataset IDs: 0

Constraints preserved:

- Frontend-only scope
- No backend/API/API automation
- Synthetic healthcare data only
- No real PHI/secrets

Next step recommendation: Step 1.10
