

Objective:

Define complete UI blueprint for future frontend implementation.

Delivered:

- UI architecture and design system
- navigation architecture and page specifications
- component strategy and role-based UI model
- form validation, responsive and accessibility strategy
- UI testability architecture
- UI to AI integration boundary and AI concept mapping

Constraints Preserved:

- no frontend runtime implementation
- no backend/API/API automation
- no RAG/MCP/agent runtime implementation

Status: PASS
